## **DETAILED ACTION**

1. Applicant's amendment in Paper No. 5, which apparently revises claim 1 and actually adds new claim 2, is acknowledged. This amendment is in response to a 9/12/02 Office Action.

2. In response to the subject Office Action wherein the Examiner: a) objected to the specification under 35 U.S.C. 112, first paragraph, as failing to provide an enabling disclosure; b) rejected the previous claim 1 under 35 U.S.C. 101; c) and c) rejected said claim under 35 U.S.C. 112, first and second paragraphs, applicant himself admits it is impossible for him to provide the information and operating parameters cited by the Examiner as necessary to enable one having ordinary skill in the art to exercise the claimed invention. This admission is sufficient proof that the applicant does not possess an operative embodiment for his claimed utility invention.

Accordingly, the objection and rejections in said previous Office Action apply to the claims in applicant's amendment, as discussed below

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

- Art Unit: 3641

### ***Specification***

3. This application is informal in the arrangement of the specification. The specification and claims are in improper form.
  
4. The specification is objected to under 35 U.S.C. 112, first paragraph, as failing to provide an adequate written description of the invention and as failing to adequately teach how to make and/or use the invention, i.e., failing to provide an enabling disclosure.

The claimed invention is a method of production of precious elements, including gold, platinum, palladium and silver from fissions of other elements. However, there is no adequate or enabling disclosure of how such could be accomplished using the applicant's invention. The reasons are as set forth in Section 4 of the 9/12/02 Office Action.

### ***Claim Rejections - 35 USC § 101***

35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

5. Claims 1 and 2 are rejected under 35 U.S.C. 101 because the claimed invention as disclosed is inoperative and therefore lacks utility. There is no factual evidence to show that the invention is operative.

The reasons are as set forth in section 5 of the 9/12/02 Office Action and in section 2 above.

***Claim Rejections - 35 USC § 112***

6. Claims 1 and 2 are rejected under 35 U.S.C. 112, first paragraph, for the reasons set forth in section 6 of the 9/12/02 Office Action and in section 2 above.

7. Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite in that each fails to point out what is included or excluded by the claim language. Each of these claims is an omnibus type claim.

Claims 1 and 2 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted steps are the steps of producing gold and other precious metals and elements from splitting of other elements.

See also section 2 above.

***Conclusion***

8. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Rick Palabrica whose telephone number is 703-306-5756. The examiner can normally be reached on 7:00-4:30, Mon-Fri; 1st Friday off.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Carone can be reached on 703-306-4198. The fax phone numbers for the organization where this application or proceeding is assigned are 703-305-7687 for regular communications and 703-305-7687 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1113.
